DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 27 September 2005 has been entered.

Summary of changes in this action

1. The indefiniteness rejection has been overcome.

Claim Objections

Claims 10-12 are objected to as being informal. In claim 10, line 8, "hat" should be changed to --that--. Appropriate correction is required.

The above objection has not been addressed.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-9, 13 and 15-21 are rejected under 35 U.S.C. 102(b) as being anticipated by Gilbert (5,077,541).

With respect to claim s 1-9, 13, 15-19 and 21, Gilbert discloses, in Figs. 3 and 4, a circuit comprising: "a first stage means (36) that includes an array of amplifier circuits (6)"; each

Art Unit: 2816

amplifier including “an offset adjustment circuit (I)”, “a common node (inputs to 28)” and “an input (bases of 36)”; “a second stage means (28)”; “a reference signal (SIGNAL OUTPUT)”; “a feedback means (feedback resistor, R , R_T and resistor between 38 and R_T)”; and “a null control means (R_S)”. Since the feedback arrangement would provide a band-gap operation, it would have been more than reasonable to consider the “feedback means” to be a “band-gap core circuit”.

With respect to claim 20, clearly the above circuit to Gilbert will provide the recited method.

Allowable Subject Matter

Claims 10-12 and 14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
